Career Objective

B.Tech Computer Science and Engineering student with strong interest in frontend web development, Shopify development, and modern web technologies. Skilled in building responsive web applications using HTML, CSS, JavaScript, Python, and React while continuously improving full stack development skills.

Education

QIS College of Engineering and Technology	2023 – 2027
B.Tech in Computer Science and Engineering	CGPA: 8.31
Ongole, Andhra Pradesh	
Narayana Junior College	2021 – 2023
Intermediate (MPC)	92%
Oxford High School	2021
SSC (10th)	100%

Technical Skills

- Languages: HTML, CSS, JavaScript, Python, Kotlin
- Frameworks & Tools: Bootstrap, React, Shopify, GitHub, VS Code
- Database: MySQL
- Technologies: IoT, Arduino IDE
- Currently Learning: MERN Stack

Projects

Urban Threads – Shopify E-commerce Store

- Developed a fully functional Shopify e-commerce website with responsive product pages, collections, and pricing features.
- Implemented modern UI design and optimized mobile shopping experience.
- Live Project: [Urban Threads Shopify Store](#)

Gas Leakage Detection System

- Built an IoT-based gas leakage detection and exhaust fan automation system using MQ-2 sensor and Arduino.
- Developed a monitoring website to display system information and safety awareness.
- Live Project: [Gas Leakage Detection System](#)

Hotel Booking App

- Developed a responsive hotel booking web application using HTML, CSS, and JavaScript.
- Designed modern room booking interface with mobile responsive layout.
- Live Project: [Hotel Booking App](#)

Food Delivery App

- Built a responsive food ordering website with interactive menu and clean frontend design.
- Improved user experience using modern UI components and responsive layouts.
- Live Project: [Food Delivery App](#)

Internships

Frontend Developer Internship – Cognetix Global Technology LLP

- Worked on responsive frontend web pages using HTML, CSS, and JavaScript.
- Improved practical knowledge in frontend development and UI design.

AI-ML Virtual Internship – AICTE & EduSkills

- Learned fundamentals of Artificial Intelligence and Machine Learning concepts.
- Gained exposure to practical AI/ML workflows and applications.

Certifications

- Ignite India Program – Wadhvani Foundation
- Responsive Web Design Certification – freeCodeCamp
- AI Foundation Course – Jio Institute
